To Whom It May Concern:

I recently became acquaintances with Jenifer Parrish, as I was needing to have a Jersey heifer AI'd. I ended up not having my girl AI'd but rather used the service of a bull for live cover. Jen understood and kindly said, that if I needed her help in the future with feed or semen services, to contact her.

She informed me that her specialty was dairy cows and goats. It just so happened that I had goats and had actually been doing all I could to keep them in good nutritional health. I asked her a few questions about my goats and she offered me some of her specialty goat ration to try. I didn't feel it could hurt and it would be checking to see if my own efforts with individual supplements would compare.

After approximately three month on the goat ration Jen had formulated, my goats looked like no other goats I had ever seen. My attempts of individual treatments every six months with copper bolus, selenium, vitamin B shot, and wormer were not even close to giving them the body condition and soft glossy coat that PNP feed has. I stand behind this product 100%. For people looking for the perfect blend of nutrition for the perfect performing goat, this product is the best I have used. I will continue to use PNP feed now that I have seen superior results compared to my attempts at introducing nutrition through injection, boluses, and loose minerals. The ease of having all the nutrients in the feed on a daily basis cuts record keeping down and increases the quality of life for the goats by reducing possible infections at injection sites.

Please feel free to contact me at any time if you have additional questions about the feed or about my business interactions with Jen, by calling me at 309-785-5455, you can leave me a message and I'll get back to you as soon as I can. You can also write to me by Email to [JDog1222@aol.com](mailto:JDog1222@aol.com) or my home address, attention: Jillian M. Reed 721 North 7<sup>th</sup> street Cuba, IL 61427. Jen is extremely pleasant to deal with, quick to reply to questions, and goes way beyond the call of duty to care for others' animals as if they were hers.

Thank you very much.  
Jillian M. Reed
